Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### CLAIMS REJECTION

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Matumoto (6,197,452).

The patent discloses a multi-wiring structure in the front page composed of parallel first wiring assembly (110), a connecting position (101) in parallel with wiring (the connection position can be interpreted multi-directional that reads on the claim language) and another set of second parallel wires orthogonal to the first wiring lines and intersecting the same at the connecting positions. The claimed exposure and patterning are also discussed in the patent (see abstract). Although the prior art may have been silent about the claimed "divisional exposure", it would have been obvious to one skilled in the art to safely assume that the masking and patterning step of making the wiring assembly as in the patent or in general is generic to a single or multiple exposure conditions based on the anticipated result.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to PN: 6,518,180.

Claims 1-10 have been allowed.
